

BIO2010F exam workshop structure

Lead by:

*Ruan van Mazijk (MSc candidate) &
Thembeke Shongwe (BSc Hons candidate)*

2019

The workshop is intended to be very loosely structured as follows:

(i) Studying for university tests & exams

1. *How* to study—reading like a parrot vs reading with understanding
2. How *much* to study
3. *What* to study—getting bogged down in “facts” vs conceptual understanding

(ii) Reading university text & exam questions

1. Practicing understanding what questions are asking
2. Understanding how to structure an answer

(iii) Practice questions on your own

Some of the practice questions will be left for the students to try on their own. We will go over their answers together in the second session.
